Part B for Jan 49

SUBJECT

Reviews of Improvements works done on the City Improvement Trust Board Mysore

To The Chairman, C I T B Mysore

No L 8591/D 28-1-49

Issues instructions

Serial No

From the chairman,
Tuticorin Trust Board
NO P C 31 dt 9-9-48

Forwards a copy of a brief review of the improvements carried out in the Trust area from the date of his assuming charge of the office

1) The review is submitted for perusal with important portions marked. It is seen therefrom that the chairman has given instructions to the staff both the executive and ministerial — to set right the defects noticed by him during inspections of the several sections of the Trust Board

2) The last para of the note — vide pages 8 & 9 of the report — requires special attention. Here, he stresses on the need to have the office of the Trust Board transferred from time to time, both in the interest of the office and of the Trust Board

A brief report on the works carried out by the Hyme Trust Board etc

BRIEF REVIEW OF IMPROVEMENTS DONE IN THE CITY IMPROVEMENT TRUST BOARD, MYSORE, FROM IST FEBRUARY 1948

The first thing that struck me soon after I took charge was that the routine work was not being carried out in the way prescribed in the Trust Board Manual Some of the registers were not being maintained at all and some not properly posted For example the Trust Property register was not posted up-to-date making it difficult if not impossible, to make out which are Trust properties and which are not

Secondly the Register for acquisition Schemes does not give a correct idea of the actual stage at which each case is held up or pending, with the result that some of the Schemes are likely to be lost sight of and so much so the energy spent in preparing the Scheme wasted With a view to set right these defects, a meeting with the Ministerial staff was held on 29/2/48 when the procedure laid down in the Business Manual was read out and explained section by section to the Officials and instructions issued for proper and strict observance of the said procedure It was felt by exchange of ideas at this meeting that the want of a separate whole time Manager to the Office is not in a small measure responsible for the present state of affairs A Note was therefore prepared and placed before the Board for having the post of a Manager to supervise the work of the Office and the Board has kindly sanctioned the same in its resolution No.408 dated 25/3/48 Government have been requested to sanction the proposal and orders are yet awaited Soon after this, a meeting with the Executive staff was also held and the portion of the Business Manual relating to the outdoor work was also explained in detail It was seen at this Meeting that some of the returns stipulated ∅ in the Business Manual were not at all submitted by the subordinates They were impressed about the necessity of submitting such returns regularly every month and they are now doing so The next

point that I considered as being very important to maintain Block-Plans of each Mohalla marking thereon all Trust Board bits and sites in the ownership of the Trust Board up-to-date It was learnt that attempt was made in this direction sometime back but no concrete action has been taken The Executive staff were therefore instructed to take immediate action in preparing the key plans showing each and every bit of land belonging to the Trust Board to keep them as a permanent record to avoid and to watch all encroachments and misuse of such property by the public, as contemplated in the Business Manual These plans would prove a valuable adjunct to the Trust Board property registers and both these records together would be of immense service to detect the unauthorised encroachments, false claims and even double payments by acquisition A Note was put up for having the services of an additional Suboverseer with a Clerk for a period of 6 months to attend to this work The Board have kindly approved this suggestion in their resolution No 442 dated 10/5/48 and Government sanction is awaited In the meanwhile action is being taken to have this work done to the extent that is possible from among the available staff It was then observed by me that a large number of acquisition cases were held up at different stages for long periods. This pendency was greater in the case of Schemes involving the acquisition of survey lands The Revenue Sub-Division Officer and the Amildar were therefore requested to meet me with a view to think of ways and means of expediting the pending acquisition cases after going through each one of them individually. It was pointed out by the Sub Division Officer and the Amildar that a whole time Revenue Inspector has to be appointed to attend exclusively to the acquisition work pertaining to the Trust Board This has also been approved by the Board in their resolution No 456 dated 10 5 48 and the Goverrment orders in this behalf are also awaited.

Proposals received have already been submitted

Submitted separately

The work distributed amongst the ministerial staff was also found to be somewhat defective and a slightly modified redistribution of work has been given effect to and is now in force Some confusion was also observed in the final sorting of papers in the record section The Record-Keeper has been given definite instructions in this respect and a procedure of filing the records has also been instituted. The maintenance of files under correspondence was also shabby in some respects Instructions to properly file the same in individual file boards and stitch the papers with a pherist have been given Order-sheets have been got printed for being utilised with a view to maintain the files in a neat and presentable condition

INSPECTIONS - Weekly inspections on every Monday are being made both in my capacity as President, City Municipal Council and as Chairman, City Improvement Trust Board, with the Sectional Officers selecting one Mohalla at a time The Municipal Councillors of the respective Mohalla are also intimated in advance and requested to take part in the inspections and give their valuable suggestions With a view to see that the inspections do not end in a routine outing, a definite route is being fixed beforehand and all papers kept for my inspections are put up by the concerned section Officers to enable orders being issued at the spot and give relief to the petitioners directly wherever possible These and other instructions issued in the course of the inspections are being noted in the Inspection Notes Registers which are pursued atleast once a month to see the disposal and the action taken in each case

EXECUTION OF WORKS - With a view to watch that all sanctioned works are put on hand for execution directly without any delay soon after the formalities of calling for tenders and approval thereto are attended, and to ensure that progress on such works is maintained steadily, a month-war programme of execution showing the particulars of amount of estimate for each work and the

amount to be spent for each month has been got up The sub-overseer will at the end of each month submit their individual programme registers to the Trust Board Engineer showing the amounts actually spent against the promised expenditure in respect of each work This will enable to spot out immediately instances of delays and slackness and take such action as is deemed necessary in each case A consolidated register is being maintained in the Office showing all works in progress in all the Mohallas This procedure will further ensure promp ness of submission of Bills on the part of the suboverseers and will enable regular and periodic payments being made to the contractors which will further aid quickness of execution No completion reports were found to be submitted for works finally closed so much so all such works continued to find a place in the Accounts Registers creating good lot of confusion of complicated claims in future The completion report forms have been got printed and strict instructions are issued that all final bills must be accompanied with a completion reports duly filled up.

FREE HOUSE CONNECTIONS - The procedure in vogue to provide free house sewage connections was to take action only in such cases where individual petitions from the house-owners were received, after referring such petitions to the suboverseers concerned, getting the estimates prepared by them, sanctioning these individual estimates on receipt, and finally issuing work-orders to the contractors after getting up an indent for issue of materials in each individual case It was no wonder therefore that the average number of house connections given each month was hardly 6 to 8 in number To give an impetus to this very desirable work, the importance of which has been recognised by the Board by the fact that a heavy provision of Rs 40,000/- has been provided for the work, a new procedure has been recently instituted to carry out this work more expeditiously According to this, one particular Mohalla is selected at a time and one suboverseer exclusively meant for

this work is posted to carry out the free house connections commencing from one end without waiting for any initiative being taken by the parties The assistance of the Health Officer is requisitioned by intimating % in advance the door numbers in each Block to be provided with free house connections and requesting him to take necessary action even resorting to issue of notices in recalcistrant cases, to have the necessary interior work carried out to connect to the underground drainage through free house connections so provided Necessary precautions regarding the accounting of the materials etc , have of course been taken side by side There was perceptable improvement towards the progress secured in this connection soon after the inauguration of this system But unfortunately want of cement had proved an insurmountable difficulty However some supplies have been just been received and this work will be resumed and pushed through.

FORMATION OF NEW SITES - Though a number of layouts have been formed before, practically none of them has developed so far, firstly on account of their distance from the City, and secondly on account of difficulties met with to provide the amenities of water supply and underground drainage It was therefore thought of as being both necessary and desirable to see that as many sites as possible are laid out near about the City having accessibility to the aforesaid important services without much difficulty The following layouts come under this category The number of sites formed in each are also noted

Sl No.	Name of Layout	No of sites formed.
1).	New layout to the west of Saraswathipuram	225 + 12
2).	New layout in Block 12,12A & 13 of Chamundipuram	250
3).	New layout in Block 3A, Vani Vilasa Puram	124
4).	New layout in Vth Block south of Padavarahally	40
5)	New layout south of A K Puram between Manantody Road & Prince of Wales Road	72
6)	Additional sites formed in Medar's Block	15

(Contd)

7). Additional sites formed behind Akashavani	56
8) New layout of sites to the north of Ist Main Road, Niranjanaraj Urs Garden Layout adjoining Viceroy Road in Chamundipura	9

Some of the above layouts are in the course of execution and some of them in a stage of reaching completion It will be interesting to note that the number of sites formed and allotted to the public and under allotment from February'48 to-date is 890 For purposes of information a statement of sites allotted annually ever since the Trust Board has undertaken the work of formation of sites and layouts, is appended herewith.

In addition to this all necessary action to undertake to form additional sites in the developed xxx areas is being taken The acquisition of the lands to the east of Adijambava Colony, Jalapuri, acquisition of land in the neighbourhood of Kesere, and the acquisition of lands to the south of Kannegowdanakoppal are instances that may be cited Also a survey of vacant patches of land within the City proper is being made and wherever it is possible to layout some sites, necessary plans and estimates are being got up for sanction and taking further necessary action.

To avoid unnecessary correspondence and consequent delays a meeting was held with the Sub Division Officer and the Amildar sometime back. The stage at which acquisition cases are pending and further action necessary to be taken to expedite the same were discussed Another meeting is called for and it is expected that the above acquisitions so useful for forming sites in areas susceptable of immediate development would fructify in the immediate future

ALLOTMENT OF SITES - The procedure approved by the Board last year in the allotment of sites by calling for applications as and how new layouts are formed, and granting sites only to genuine house-seekers is being continued This is now further improved upon by placing the statement of allottees each time before the Board for their information and approval before en-

endorsements to the parties are actually issued, after making the selections out of the large number of applications that are invariably received each time The allotment of site numbers is being done by drawing lots to overcome the difficulty generally experierced after the allotments are made, by the parties submitting representations for the change of site numbers, since it is not possible to expect all the sites to be equally favourable in location ard other respects.

STORE SECTION - Instructions have been issued in detail in respect of the procedure to be observed for indenting for materials from the Trust Board Stores with special reference to the indents for the issue of Cement. The actual quantities required for each work are prepared based upon calculations over the estimated quantities of work made by the suboverseers concerned, which after [illegible]y by the Trust Board Engineer will be passed, the actual issue being made from the Store-Keeper only on the production by the contractor the necessary challan for having remitted the full value to the Trust Board Treasury The attestation of the contractors is directed to be taken on the counterfoils of the indentsxx as an additional precaution Even for the sale of released materials by auction, it will be done by the Section Suboverseer in the presence of the Trust Board Engineer Regular receipt books have been ordered to be supplied for issuing receipts to the purchasers

Necessary action is being tal en to collect the arrears of value of sites sold There is still a heavy arrears to be collected and it is necessary to increase one or two hands for this work so as to expedite this work Notices have been issued in all cases of un-built sites - sites granted prior to 1942 What further action should be taken by the Board in respect of these sites has to be considered and decided by the Board so as to expedite construction of houses It is very difficult to resume all these sites from the present owners as water is not made available and building materials not easily obtainable fc construction of houses on these sites

A New layout for Ittigegud is being prepared with a view to avoid further acquisition of houses and dismantling of the same.

The policy of completing the old Schemes is being taken up and is being followed With this end in view, Mohalla by Mohalla is being taken up and attempts are made to complete the Trust Board improvements with a view to hand over the Mohalla completely to the Municipality

Underground Drainage work is being taken up and this work requires a separate Sectional Officer and a Note for the Constitution of a Division will be placed before the Board The disposal question is very important before we lay the underground pipe lines and this question is being taken up with the concerned authorities.

DISPOSAL OF SITES - As soon as we are able to ascertain the bits and sites belonging to the Trust Board, their disposal will be taken up so as to afford conveniences to the neighbouring house owner or site owner. In respect of acquired bits, attempts are being made to complete adjustment of properties so as to complete such acquisitions for improvement works. These require some time and a good deal of effort and formalities to be gone through before we are able to show any substantial improvements. There are various Schemes half done with progress for a fairly long period and a fresh beginning will have to be made to complete the same regarding fresh layouts, notification etc.

This Note is only an attempt to give briefly efforts made during these Six Months period, and I wish to point out that due to official formalities and delay in final sanctions, a good number of items are held up As regards the staff of the Trust Board it is hardly deisrable to mention Nearly six of them belong to the Trust Board entirely and are not transferable and they are to work till they retire only in the Trust Board with little or no prospect and with no scope for transfer to other Departments Some posts are vacant for

over one year, and some officials are in this Office for more than three years It is desirable in their own interest and in the interest of the Trust Board that there should be a change infusing fresh blood and enthusiasm On the whole inspite of my best efforts to show better progress, I have not been able to reach 50 % of my target I trust with the help and co-operation of the Board Members and with the full efforts of the Members of the Staff, we shall be able to show better progress in the course of ensuing five months.

O Shamanna

CHAIRMAN,

Office of the Chairman
City Improvement Trust Board

Mysore, Dated 4th Decr 1948

From P Setaramah Esq BA BL
CHAIRMAN CITY IMPROVEMENT TRUST BOARD
MYSORE

To Janab Syed Abdul Aleem, B A ,
SECRETARY TO THE GOVERNMENT OF
HIS HIGHNESS THE MAHARAJA OF MYSORE
REVENUE DEPARTMENT BANGALORE

Sir

With reference to your letter No L 4954 dated 8th November 1948 calling for certain particulars regarding the review of improvements, carried out in the Trust Board from the date of my assuming charge of this office as Chairman, I have the honour to state as follows

(2) Statements showing (1) sanctioned works already under progress (II) unsanctioned works already under progress (III) Sanctioned works not yet taken up for execution and proposed to be taken up during the current year (IV) Unsanctioned works proposed to be taken up for execution during this year according to the sanctioned budget or according to the modifications proposed in the Budget (V) Other improvements works relating to which sanction to the estimate is awaited and to be taken up immediately funds are made available are herein enclosed for kind information

(3) A statement is also enclosed showing a list of acquisition cases which are pending As regards the information as to which of these cases are to be kept pending and which are to be withdrawn from acquisition, it will be necessary to keep each case before the Board and their opinion obtained This will be done shortly Action has already been taken to withdraw several old acquisition cases, already sanctioned in view of the altered circumstances A statement of some such cases is herein enclosed for information

(4) As regards the sites in the old City belonging to the Trust Board I wish to state that there are no proper and up-to-date records or plans to give particulars of such bits and sites in all the Mohallas All the properties acquired or pertaining to the Trust Board are being entered in a consolidated Trust Property Register from the commencement But the columns indicating the method of disposal of such lands had been left blank in very many cases So it has not been possible to work out immediately as to how many sites or bits (apart from the area utilized for road and other improvements) are now ready for disposal Extracts have now been taken from the Trust Board Registers of Trust Board lands which do not show the method of

disposal ex and given to the Suboverseers of the concerned Mohallas to personally go and examine on the work-spot how these lands have been disposed of About 14 such extract statements have been prepared from 1925 to 1948 and given to the Suboverseers for report So far only 5 statements have been received back with necessary particulars

1	Nazarbad Mohalla	5 Vacant sites
2	Mandi Mohalla (Blocks 11,12,16)	Nil
3	Mandi Mohalla (Blocks 1,3,4,7, 11, 16, 17, Budududikere & Industrial Suburbs)	5 (other sites have been handed over to the Buildings Division)
4	Chamaraj Mohalla	1
5	Devaraja Mohalla	13

After return by the Suboverseers of the other statements (extracts from the Trust Board Property Register) the exact number of sites and bits available for disposal in other parts of the City will be furnished It is very much regretted that this Property Register was not arranged to be completely posted during the regime of my predecessors However every attempt is being now made to fill up the previous ommissions atleast during my tenure of office A detail note pointing out the urgency and importance of this work was placed be the Board with proposal for getting sanction for the post of separate Suboverseer for being placed in charge of this work for a period of six months and the Board have approved of the same Government have since sanctioned an establishment consisting of a Suboverseer and a clerk for a period of six months The Chief Engineer has ordered the posting of a Suboverseer, who has not as yet reported for tudy In the meanwhile the above work is being got done by the existing staff only

Yours faithfully,

Chairman 3/12
